This relates to images
Add a QR Code, to allow the viewer
to simply scan-direct-to-your-website-page

Properties:
By far the most popular use case for installing a window screen
It allows Estate Agents / Letting Agents / etc
To take advantage of automated digital property carousels

WebPages:
Allows you to display a live webpage.
Example - Social Media / Live Feed

Money Savings:
Once the cost of screens and CMS purchase is overcome…
The savings are on costs of Property LED Pockets (purchase and future replacements)
The savings are on costs of Back-Lit Film, Printing, Printer, Ink Costs

(CMS) Contact Management System - Clever Digital Signage control from remote locations - to - several branches

Costs:

Screens: We list a number of 'Ultra Brightness Media Screens' on our website
Ultra' screens are vital for all Estate Agents, that want to advertise in their **'Window' area**
or
Pro' screens if advertising within **"Interior Walls"**
Also - Screens can be used either 'Landscape or Portrait"

Website Page =	**Go to 'Home Page'**

You will require 1x screen per branch
Each branch screen, will need to be connected to the 'Internet'

Website Page =	**CMS SYSTEM**

CMS Upgrade   You will be required to purchase a CMS Upgrade on each and every used screen
Unless, your current system already has the compatibility

CMS Subscription: There are 3x levels of subscription, they are
1x Year 'Subscription' service
3x Year 'Subscription' service
Life-Time 'Subscription' service
