Options

We have listed a few examples of what is possible

However;

We understand that clients may want a different set up

IF this is the case

Please do not hesitate in calling us as we can design the perfect system to reflect your own business needs

Tel: 01244 470903

Fitting Instructions - Windows

- 1 Decide where your display will start - (We would advise working left to right)
- 2 Attach one of the top connectors to your top windowsill or ceiling
- 3 **Warning** = Top connectors supports all the weight so, ensure a secure fitting, use your own unique screws if necessary!
- 4 Thread supplied cable through, secure and at this point you will have the cable suspended from your ceiling
- 5 Repeat steps 2 to 4 for additional cables however; calculate the measurements between cables with grippers and acrylics
- 6 First and Last cables (end-cables) thread 8x single grippers onto each cable
- 7 Central cables thread 8x double grippers onto each cable
- 8 Decide the location of first acrylic - slide grippers to each corner and secure, also use a spirit level
- 9 Next acrylic (underneath the first) is then, added - we recommend a 5cms gap between each acrylic
- 10 Once first column has been completed now, move onto the next column
- 11 Once all columns have been completed
- 12 Amend grippers and acrylics so, they are all level and secure - that's it
- 13 Now add your property details!

Congratulations you have now 'Completed your Display'

Fitting Instructions - Walls

This is the same process as fitting the window type display except the cables holders require the following steps

- 1 Decide where your display will start - (We would advise working left to right)
- 2 Secure top section of cable holder into your wall using a raw plug and screw
- 3 Re-attach the top section to holder, at this point you will have your cable hanging down - repeat for all other cables
- 4 Remove the middle tensioner, thread your 8x grippers onto each cable (Singles on end cables and Doubles on joining cables)
- 5 Follow window steps 8 to 12
- 6 Now replace the tensioner on each cable but, before doing so, cut the cable to the desired length
- 7 Now attach the bottom holder to your wall
- 8 Now adjust the tensioner to make the cable taut
- 9 Repeat the process for all additional cables - that's it
- 10 Now add your property details!

Congratulations you have now 'Completed your Display'

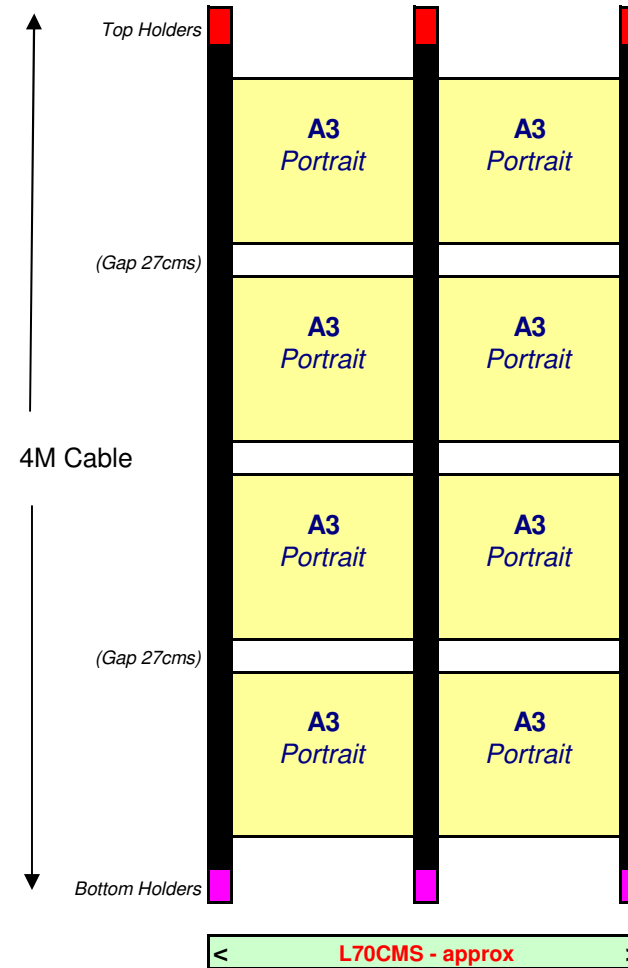

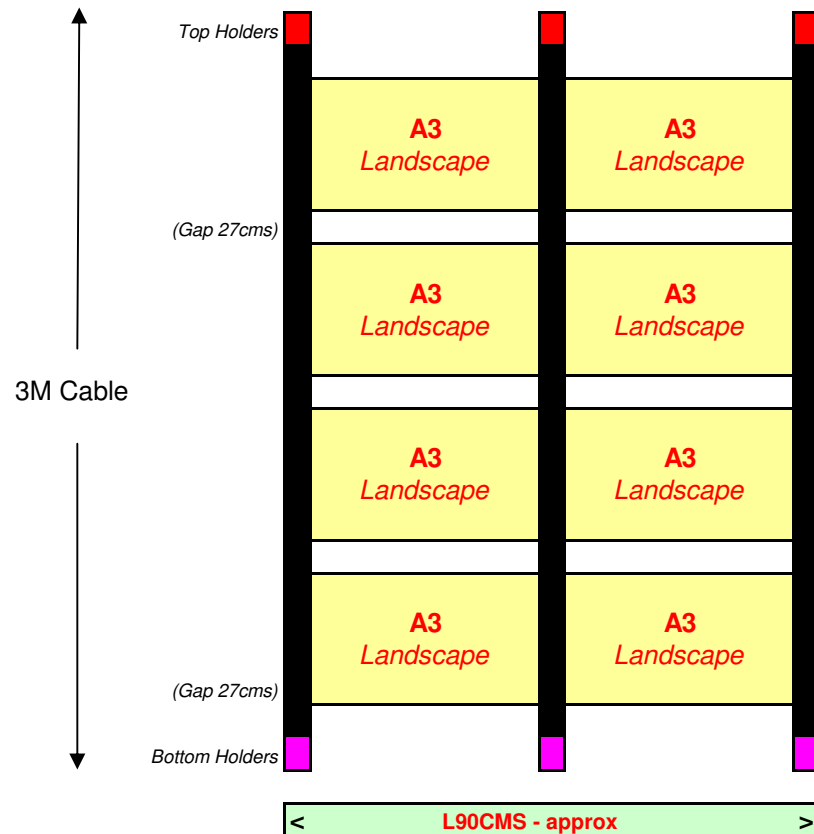

1x Column Display

- 4 x A3 Portrait or Landscape Acrylics
- 2 x Cables - Window Cables 4M or Wall Cables 3M
- 16 x Single Grippers
- 0 x Double Grippers

2x Column Display

- 8 x A3 Portrait or Landscape Acrylics
- 3 x Cables - Window Cables 4M or Wall Cables 3M
- 16 x Single Grippers
- 8 x Double Grippers

3x Column Display

- 12 x A3 Portrait or Landscape Acrylics
- 4 x Cables - Window Cables 4M or Wall Cables 3M
- 16 x Single Grippers
- 16 x Double Grippers
