Google Maps - Zoom function

Tip 1:
Just remember, the more you zoom out
The, less street names will appear

Tip 2:
The more you zoom in
The, less area will be covered

Wallpaper Map - Details

Map Information Sheet - Wallpaper	Finer Details

Details:

1. Practical & Effective - "Street" + 'Birds Eye" + "Regional" = Wallpaper Maps

2. Paste Free Self-Adhesive (Polyester Blend) inkjet media

3. Paste Free means it can be used on any (non porous) surface.

4. Polyester Blend 280gsm + will stick to walls, doors and windows.

5. Very durable - will not rip or wrinkle.

6. Ideal position is the rear wall in most Estate Agent Buildings

7. Follow the helpful advice on the image + PDF File

Fitting to Walls - Example

Same as if DIY Wall papering

However; here are some handy guides.....

1. Prep the wall, ensuring its nice and smooth

2. If working left to right, apply the first roll to the wall

3. Repeat as you are going left to right

4. Now you will need to trim the waste-

5. Once completed, add ceiling lights to highlight the map

Version 1 - Street Map View

1. When designing using Google Maps, you can simply zoom in and out

2. However; the more you zoom in - the more street names will actually appear

3. But, the more you zoom out - street names will disappear and road names will appear etc

4. Hence be careful, when you are designing

Version 2 - Birds Eye View

1. When designing using Google Maps, you can simply zoom in and out

2. However; the more you zoom in - the more 'Road' names appear

3. But, the more you zoom out - 'Road' names will disappear and 'Major Roads' + 'Rivers' will appear

4. Hence be careful, when you are designing

Version 3 - Regional Maps

1. When designing using Google Maps, you can simply zoom in and out

2. However; the more you zoom in - the of a 'County' will appear

3. But, the more you zoom out - '1x Country' maybe replaced with 2 or 3x Counties
