

Illuminated Fabric Wall Maps

- | | |
|---|---|
| 1 | Just decide where the Fabric Display will be placed, then, assemble the frame and secure to the wall |
| 2 | However; remember a power supply is required, for best results, we recommend a hidden power supply |
| 3 | Hidden power supply, makes the finished display look much better, so, add a power socket before the frame work! |
| 4 | Now test the lighting is working 100% |
| 5 | Before adding the Fabric Print - Always turn off the power |
| 6 | Now insert your "Fabric Print" into the frame |
| 7 | Now turn on the power, and admire you're finished display - that's all there is to it |

Illuminated Fabric Wall Maps are supplied in 6x Versions...
